

# ACCENT LIGHTING

## 3 BASIC TYPES

### DOWN LIGHTS

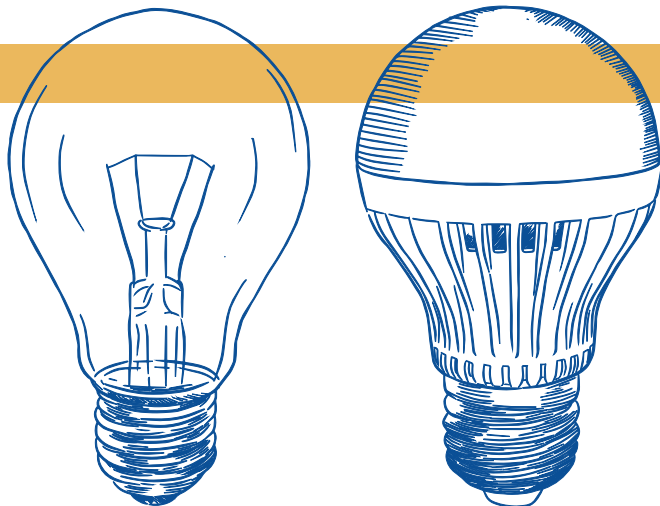

Installed high on a wall, structure or pole to shine downward on their targeted area.

### PATH LIGHTS

Usually on a short stem close to the ground, shining over over a small, limited area.

### UP LIGHTS

Installed in the ground or at a low angle to shine upward on their targeted area.

## BENEFITS OF LED LIGHTBULBS

Halogen bulbs were the old standard, but with the LED revolution, homeowners can enjoy longer-lasting lighting that is more energy efficient.

1. **Same light output**
2. **At least 85% less energy used**
3. **Less heat produced**
4. **40,000–60,000 hours of life**
