

LANDSCAPE LIGHTING 101: NIGHTSCAPING

NIGHTSCAPING

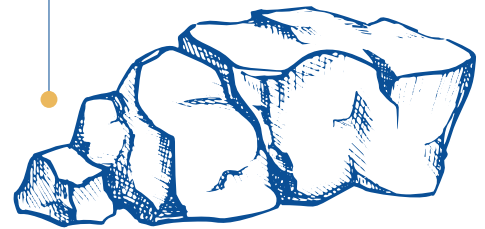

Nightscaping uses accent lighting to beautify the best features of your landscape at night. It can also illuminate dark walkways, increase security and create a perfect ambiance for your outdoor living space.

POPULAR FEATURES TO HIGHLIGHT

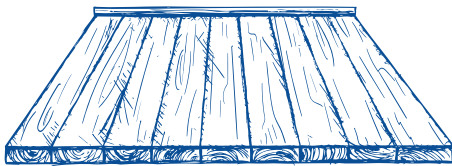

Sculptures

Decks

Water Features

Pathways

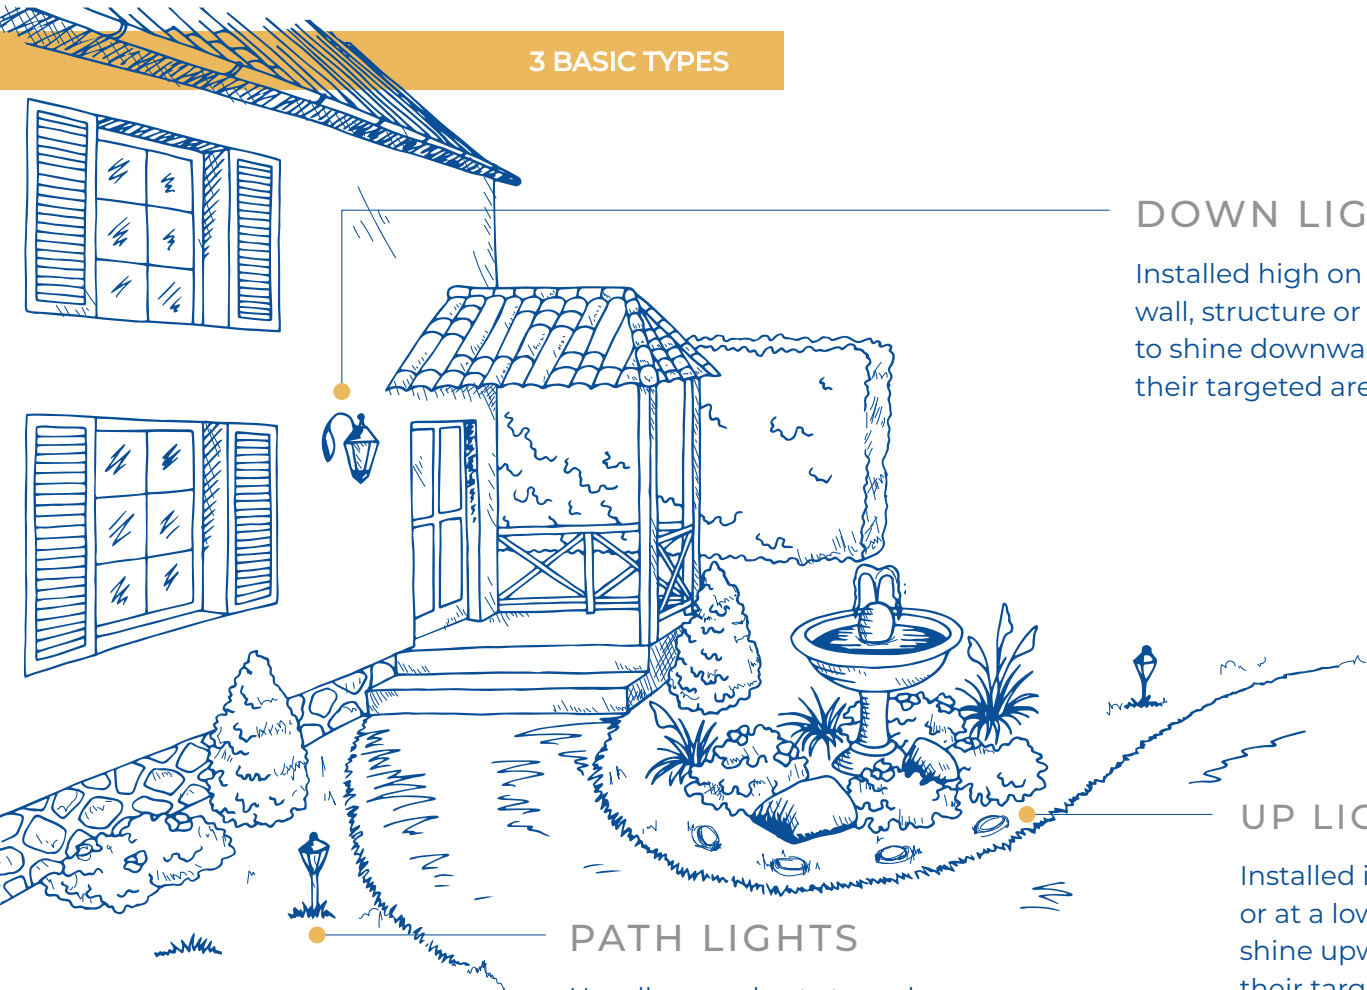

Patios

Driveways

ACCENT LIGHTING

3 BASIC TYPES

DOWN LIGHTS

Installed high on a wall, structure or pole to shine downward on their targeted area.

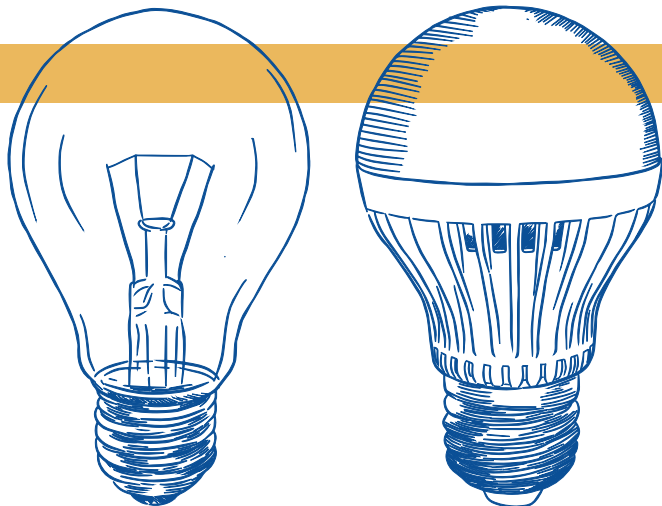

UP LIGHTS

Installed in the ground or at a low angle to shine upward on their targeted area.

PATH LIGHTS

Usually on a short stem close to the ground, shining over over a small, limited area.

BENEFITS OF LED LIGHTBULBS

Halogen bulbs were the old standard, but with the LED revolution, homeowners can enjoy longer-lasting lighting that is more energy efficient.

1. **Same light output**
2. **At least 85% less energy used**
3. **Less heat produced**
4. **40,000–60,000 hours of life**
